

MECCANO®

4/5/6

© Meccano Limited Binns Road Liverpool 13 England

How to use this Book

On the back cover of this Book you will find pictures of the parts in Outfits 4, 5 and 6 together with their names and Part Numbers. Parts used in the assembly of the models shown in this Book generally can be identified simply by looking at the illustrations, but where the identity of a Part may not be quite clear, its Part Number is printed in RED on the illustrations.

Each model is accompanied by a list of the Parts needed to build it. In this list the Part Numbers are printed in RED and quantity required in BLACK.

Some arrangements of Meccano Parts are used frequently in model-building. They are called *Basic Meccano Constructions* and are illustrated on pages 15 and 16 of the 1 Model Book. Each has an identifying Code Mark, i.e., BC1, BC2, etc. When you see one of these Code Marks in the illustrations in this Book, it indicates the principle of construction referred to by the same Code mark in the 1 Book.

Some models are most easily constructed and illustrated in separate units. The points at which these units are bolted together to form the complete model are indicated in the drawings by red dots or bolt-heads. In cases where Red indicating lines pass behind Plates or other parts of a model, these are shown dotted.

Motors used in models are identified in the illustrations by one of the following Code Marks: M1 = Meccano Magic Motor; M2 = Meccano No. 1 Clockwork Motor; M3 = Meccano E15R Electric Motor; M4 = Meccano Emebo Electric Motor.

Cada modelo va acompañado por una lista de las piezas que se necesitan para construirlo. En esta lista los números de pieza están impresos con tinta ROJA y la cantidad requerida con tinta NEGRA.

En la construcción de modelos se usan con frecuencia algunos conjuntos de piezas Meccano, que se llaman *Construcciones Básicas Meccano* y se ilustran en las páginas 15 y 16 del Libro de Modelos No. 1. Cada uno tiene una Referencia de Identificación, como por ejemplo, BC1, BC2, etc. Cuando vean una de estas referencias en las ilustraciones del libro, indicará el principio de construcción a que se corresponde la Referencia del Libro 1.

Algunos modelos se construyen con gran facilidad en unidades independientes, que se ilustran en el libro. Los puntos en que estas unidades se atornillan para formar un modelo completo, se indican en los dibujos por medio de cabezas de tornillo o puntos de color rojo. Cuando las líneas indicadoras rojas pasen por detrás de las planchas u otras piezas del modelo, éstas se muestran por medio de puntos.

Los motores de los modelos se identifican en las ilustraciones mediante una de las siguientes referencias: M1 = Motor Mágico Meccano; M2 = Motor Meccano No. 1 de mecanismo de reloj; M3 = Motor Meccano Eléctrico E15R; M4 = Motor Eléctrico Meccano Emebo.

na montagem de modelos. Estas combinações são chamadas *Construções básicas do Meccano* e são ilustradas nas páginas 15 e 16 do Livro de Modelos 1. Cada uma tem uma marca de código, por exemplo, BC1, BC2, etc. Quando V.Exa vir uma destas marcas de código nas ilustrações neste livro, ela indica a maneira de construção, referida pela mesma marca de código, no Livro 1. Alguns dos modelos são construídos facilmente e ilustrados em unidades separadas. As pontas de ligação a que estas unidades poder ser aparafusadas para completar o modelo são indicadas nos desenhos por pontas vermelhas ou cabeça de parafuso. Quando as linhas indicadoras passam atrás de placas ou outras peças dum modelo, então são feitas a ponteado.

Os motores usados nos modelos são identificados nas ilustrações por uma das seguintes marcas de código. M1 = Motor Magico Meccano; M2 = Motor Meccano No. 1 de mecanismo de reloj; M3 = Motor Meccano Electrico E15R; M4 = Motor Electrico Meccano Emebo.

framgår av samma kod-nummer i boken 1.

Några modeller är mycket lätt att konstruera, särskilt som de är avbildade i två eller flera enheter. De ställen, vid vilka dessa enheter sedan sättes samman för att bilda den färdiga modellen, angivs på ritningarna med röda punkter eller bulthuvuden. I de fall då röda hänvisningslinjer passerer bakom plåtar eller andra delar i en modell, är dessa linjer ej heldragna.

De motorer, som används i modellerna, utmärkasi illustrationerna med en av följande kodbeteckningar: M1 = Meccano Fjädermotor Magic; M2 = Meccano Fjädermotor nr 1; M3 = Meccano Elektrisk Motor E15R; M4 = Meccano Elektrisk Motor Emebo.

Modo de utilização deste livro

Na contra-capa deste livro poderá V.Exa ver ilustrações das peças dos Estojos Nos. 4, 5 e 6, com os respectivos nomes e números. As peças usadas na montagem dos modelos incluidos neste livro podem geralmente ser identificadas pela simples observação das ilustrações, mas para o caso da identificação das mesmas não ser clara, são os números das peças impressos em VERMELHO na ilustração.

Cada modelo é acompanhado por a lista de peças necessárias para a sua construção. Nesta lista os números das peças estão marcados em VERMELHO e a quantidade necessária em PRETO.

Algumas combinações das Peças do Meccano são usadas frequentemente

Hur man använder denna bok

På bakidan av omslaget till denna bok finns de olika delarna i Byggläddor 4, 5 och 6 avbildade jämte benämningar och artikelnummer. De olika delar, som ingår i modellerna i den här boken, kan i allmänhet lätt identifieras vid en blick på illustrationerna, men där det kan råda tvekan om vilken del som avses, är denna nummer tryckt med rött på avbildningarna.

För varje modell finns en förteckning över de delar man behöver för att bygga den. I denna förteckning är numren på delarna tryckta med RÖDT och erforderligt antal med SVART.

Några sammansättningar av Meccano delar används regelbundet när man bygger modeller. De kallas *Meccano grundkonstruktioner* och avbildas på sidorna 15 och 16 i modellboken. Hver har ett kodmerke, f.eks. BC1, BC2 o.s.v. När man ser något av dessa kodnummer i avbildningarna i denna bok, så anger detta, att principen för konstruktionen är den, som

framgår av samma kod-nummer i boken 1.

Modo de empleo de este libro

Al dorso del libro verán ilustraciones de las piezas que forman los Juegos 4, 5 y 6, junto con sus nombres y números de pieza. Las partes usadas para armar los modelos que figuran en el libro se suelen identificar simplemente mirando en las ilustraciones, pero cuando no sea fácil identificar la pieza, se imprime su correspondiente número con tinta ROJA sobre las ilustraciones.
